## SEED ANNUAL

### for 1935

---

#### *To Our Friends and Customers:*

We take this opportunity to express our sincere appreciation and thanks for your liberal patronage and friendly cooperation. We trust that our service has been satisfactory and that you will again send us your orders for seeds and any other products we handle.

We aim to have the best obtainable stocks from this country, with a few high grade specialties from abroad. Seeds are mostly sold on confidence and our steady growth over a period of 20 years indicates that through our choice of good stocks we have fulfilled the trust our customers have placed in us.

This year has in several ways been a different year from production of crops, but even so, you will find only a few increases in prices and some of the prices has even been reduced.

Any order or inquiry you send us will receive prompt, careful, and courteous attention.

*Respectfully,*

**DANISH SEED COMPANY,**

*Chris Mosberg.*

---

#### **TERMS NET CASH**

All prices subject to changes and to being unsold.

On larger orders kindly ask for special quotations.

Delivery charges will be paid by us for all seeds except Peas, Beans, Corn, Bird Seed and Lawn Seed.

---

*We give no warranty, express or implied, as to description, quality, productiveness, or any other matter connected with the goods we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned. Examine seeds closely, test if desired, and if anything is wrong, the seed will be replaced or money refunded.*

# VEGETABLE SEEDS

## ASPARAGUS

		Pkt.	5c	\$0.10	\$0.30	\$1.00
		Oz.	1/4 Lb.	Lb.		
10	<b>Washington</b>					

Very large stems, rustproof, grows very rapidly and can be used partly 2 to 3 years after seeding.

### 14 Washington Plants

We recommend to plant 1-year-old plants of this variety, and offer strong plants for \$10.00 per 1,000—\$1.50 per 100—and 40c for 25 plants.

*Sow the seeds thinly, in rows, in the early spring, and dig up and plant in permanent bed the following early spring. Set the plants not closer than 15 in. apart in trenches with the tip of the plant 6 to 8 in. below the surface of the ground, spreading the roots out evenly in all directions.*

## BEANS—YELLOW PODDED BUSH

*Sow the beans in rows leaving at least a 15 in. space between the rows, and either drop the seeds separately 2 or 3 in. apart, or drop 3 or 4 seeds in hills about 18 in. apart.*

		Pkt.	5c	.10	.25	Lbs.
		1/4 Lb.	Lb.			
18	<b>Unrivalled Wax</b>					
	Very early, tender and prolific, half round, straight slim pods. Seeds light brown, good market variety.					
20	<b>Roundpod Kidney Wax or Brittle Wax</b>			.10	.25	2.00
	Stringless, round, slightly curved pods, high quality. Seeds white with dark spots.					
22	<b>Pencil Pod Black Wax</b>			.10	.25	1.80
	Straight round pods, stringless.					
25	<b>Improved Golden Wax</b>			.10	.25	2.00
	Good old variety, flat pods. Bears a long time if kept picked. Seeds white and violet.					
26	<b>Webber Wax (Cracker Jack Wax)</b>			.10	.25	1.80
	Early, prolific, fleshy pods.					
28	<b>Sure Crop Black Wax</b>			.10	.25	2.00
	Very early, tender when young but slightly stringy when old. Seeds black.					

## BEANS—GREEN PODDED BUSH

95	<b>Italian Green Sprouting</b> .....	.10	.30	1.00

Early maturing, very tender.

**BRUSSELS SPROUTS**

*Sow the seed in early spring and when plants are large enough, transplant to permanent place, setting the plants about 18 inches apart.*

98	<b>Odense Market</b> .....	.05	.25	.....
	Half tall with firm sprouts setting close on the stalk.			
99	<b>Long Island Improved</b> .....	.05	.30	.....

Very short early variety.

**CABBAGE**

*Nearly all our Cabbage Seeds are grown in Denmark and will give good satisfaction in almost any climate. For the earliest crop, sow the seed very early and have good plants hardened and ready to set out in the field in April. For late Cabbage in this vicinity, the seed should be sown in first half of May and the plants set out the last half of June in rows 2 to 3 feet apart and the plants about 2 feet apart.*

		Pkt.	Oz.	1/4 Lb.	Lb.
105	<b>Early Jersey Wakefield</b> .....	.05	.20	.60	2.00
	Very early, pointed heads.				
108	<b>Golden Acre</b> .....	.05	.30	1.00	3.25
	Very early, round solid heads. Ready a few days later than the pointed variety.				
109	<b>Extra Early Summer Ballhead</b> .....	.05	.25	.80	3.00
	Round, very early, under some conditions earlier than Golden Acre.				
110	<b>Earliest of All</b> .....	.05	.25	.80	3.00
	Very early, round solid heads.				
112	<b>Copenhagen Market</b> .....	.05	.25	.80	2.75
	Very early, large, round, solid heads. If planted late, it makes an excellent Kraut cabbage.				
113	<b>Marion Market</b> .....	.10	.40	1.25	4.00
	Yellow resistant, Copenhagen Market type.				
116	<b>Glory of Enkhuizen</b> .....	.05	.20	.60	2.00
	Best variety for Mid-season. Can be planted closer together as it has few and smaller outer leaves. Will keep fairly well during December.				
117	<b>Globe</b> .....	.10	.40	1.50	5.00
	Yellow resistant, Glory of Enkhuizen type.				
118	<b>Flat Dutch or Brunswick Improved</b> .....	.05	.20	.60	2.00
	Large, flat heads, not very hard and not a good keeper.				
121	<b>Danish Ballhead Amager, Medium Stem</b> .....	.05	.20	.75	2.40
	Round-headed, half short stem, very good keeper. Heads uniform, very hard and heavy, not very large.				
122	<b>Danish Ballhead Munke Strain</b> .....	.05	.25	.80	2.60
	Similar to the Amager strain except this is earlier, slightly larger.				
123	<b>Danish Ballhead Hunderup Tall-stem</b> .....	.05	.25	.80	3.00
	Latest and best keeping cabbage, heads round or balloon shaped. For best result, this variety should be planted two weeks earlier than the short-stemmed variety.				
126	<b>Wisconsin Hollander</b> .....	.05	.25	.80	3.00
	Yellow-resisting strain, has large leaves but will do on yellow infested soil.				
128	<b>Bugner Winter</b> .....	.05	.25	.80	3.00
	Late, large round heads, good keeper, yellow resistant.				
131	<b>Hollander</b> .....	.10	.40	1.25	4.00
	Ferry's strain. Preferred by some growers instead of the Danish strain.				
132	<b>Penn State Ballhead</b> .....	....	.40	1.50	.....
	Grown by Lupton's and developed by Division of Plant Breeding of Pennsylvania State College. Slightly flat heads. Sold in sealed packages.				
133	<b>Penn State Ballhead</b> .....	.10	.35	1.00	3.50
	Danish grown seed, not sealed.				

**RED CABBAGE**

140	<b>Earliest Red</b> .....	.05	.35	1.00	.....
	Earliest, round solid heads, not a good keeper.				
141	<b>Amager Giant</b> .....	.05	.35	1.00	.....
	Very large, round, solid heads. Should be planted out early for best results.				
142	<b>Mammoth Large Red</b> .....	.05	.25	.90	.....
	Large, medium early.				
143	<b>Danish Stonehead</b> .....	.05	.35	1.25	.....
	Best variety for late use, keeps well.				

**SAVOY CABBAGE**

		Pkt.	Oz.	$\frac{1}{4}$ Lb.	Lb.
150	<b>Vertus</b> ....	.05	.25	.25	.....

Rather loose heads, leaves curled or crimped, most tender and sweet cabbage. Does not keep well.

**CHINESE CABBAGE**

*Also called Celery Cabbage, as it has no resemblance to cabbage except in the flavor. It grows upright with long or oblong loose heads, like Cos Lettuce. The seeds should be sown in late spring or early summer and the plants thinned out to at least a foot apart. Heads appear latter part of the summer.*

155	<b>Chihli</b> ....	.05	.25	.80	.....
	Very early and gives the highest percentage of fairly solid and long heads.				
156	<b>Pe-Tsai</b> ....	.05	.25	.80	.....
	Long-headed variety.				
157	<b>Wam-Bock</b> ....	.05	.25	.80	.....
	Short, thick heads.				

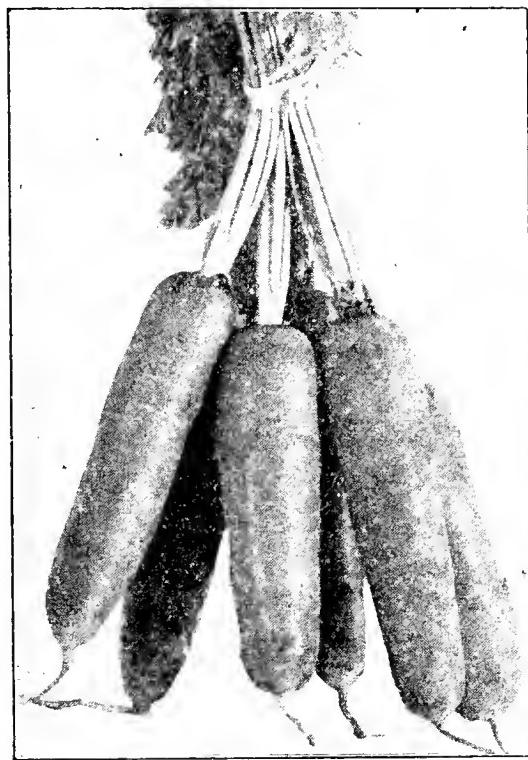

**CARROTS**

*Sow in rows at least 10 inches apart and thin out when large enough. Varieties with large tops should be thinned out to about 3 inches apart and the small-topped varieties to 1½ to 2 inches. Carrots should not have fresh fertilizer. Does best in light soil which has been richly fertilized for a crop the preceding year.*

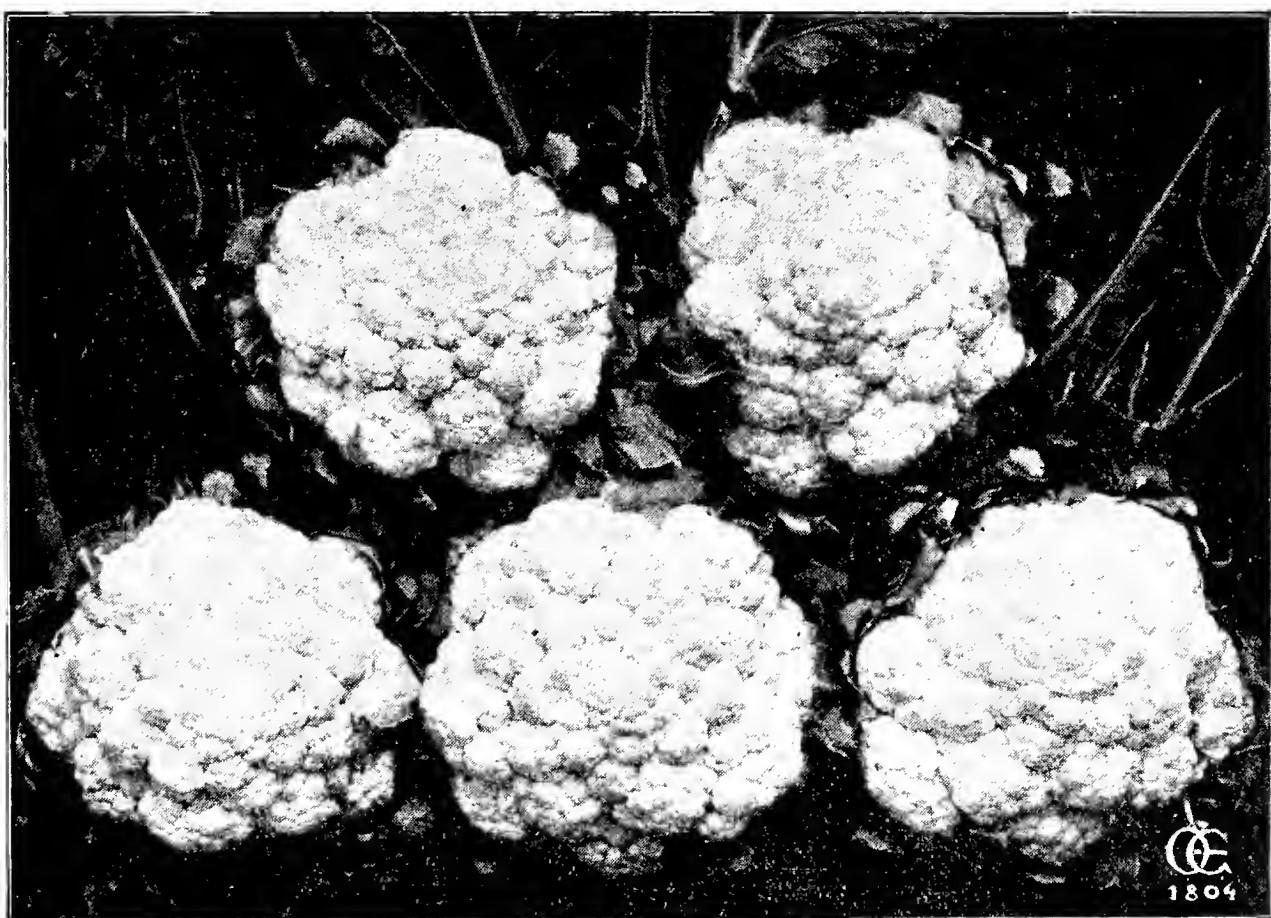

162	<b>Delicacy</b> ....	.05	.25	.80	.....
	Early, very tender and sweet. Attains the size of a little finger when ready to use. Short topped.				
163	<b>Amsterdam</b> ....	.05	.20	.60	2.00
	Short topped, very early, cylindrical, turns orange-red when about ½ inch thick. A high quality carrot, but not very large.				
166	<b>Oxheart</b> ....	.05	.10	.30	1.00
	Early, short and thick. Should be used before they get too large. Good quality.				
169	<b>Nantes Improved</b> ....	.05	.15	.40	1.50
	Coreless cylindrical shaped, deep orange-red, very sweet and tender, early, short tops. One of the best carrots for home use.				
172	<b>Chantenay</b> ....	.05	.10	.35	1.25
	Most popular Market Carrot. Early, half long, blunt rooted, deep orange flesh, tops large.				
173	<b>Red Cored Chantenay</b> ....	.05	.10	.35	1.25
	Red core, shorter top and sweeter than the ordinary Chantenay.				
174	<b>Bagley</b> ....	.05	.10	.35	1.25
	Danvers type, larger and more broad roots.				
175	<b>Danvers Half Long</b> ....	.05	.10	.35	1.25
	Medium early, half long, good quality.				
176	<b>Imperator</b> ....	.05	.10	.35	1.25
	New medium long carrot, top not very large but strong enough for bunching. roots deep orange red, indistinct core.				
178	<b>Amager</b> ....	.05	.15	.40	1.50
	Large Nantes type, deep orange-red, very sweet and a good keeper.				
180	<b>James Half Long</b> ....	.05	.10	.30	1.00
	Dark red, long pointed roots, large, very good for Winter use.				
183	<b>Yellow Champion Giant</b> ....	....	.10	.25	.80
	Very large yellow Fodder carrot. Does well in poor sandy soil.				
184	<b>White Belgian Giant</b> ....	....	.10	.25	.80
	Very large. White Fodder Carrot. Requires better soil than the yellow variety.

CAULIFLOWER EARLY DANISH SNOWBALL

**CAULIFLOWER**

For early Cauliflower, the seed should be started very early in the spring, so the plants can be strong and hardened and ready to set out in April. For late use the seed can be planted in the middle of May and the plants set out the latter half of June. We recommend to treat the bed with Semesan or Formaldehyde Dust before seeding, as the small plants are apt to damp off.

		Pkt.	Oz.	1/4 Lb.	Lb.
190	<b>Early Danish Snowball</b> .....	.25	1.75	6.00	21.00
	Our most popular variety. It is very early but equally good for late planting.				
191	<b>Early Erfurt Dwarf</b> .....	.25	1.75	6.00	21.00
	About a week later than Snowball. Leaves a little taller and the heads more flat.				
192	<b>Dry Weather or Danish Giant</b> .....	.25	1.75	6.00	21.00
	Taller and later than Erfurt, has more leaves and rounder heads. Extra good for late planting as the heavy foliage is a protection against hot weather.				
195	<b>Madsen's Super Snowball</b> .....	.25	2.50	8.00	.....
	A uniformly headed strain of Snowball, desirable where a large quantity is required at one time.				
196	<b>Catskill Snowball</b> .....	.25	1.75	6.00	21.00
	A good strain, maturing in between Snowball and Erfurt.				
199	<b>Snowdrift</b> .....	.25	2.00	7.00	.....
	New variety from Holland. Large Snow white heads.				
200	<b>Autumn Giant</b> .....	.05	.30	1.00	.....
	Late, very tall. Requires a long season to mature. Not dependable in this vicinity.				

**CELERY**

For early celery the seed can be planted in early March, under glass, and the plants set out when no more heavy frost is expected. For late celery seed can be sown outside in May and have strong plants ready by the middle of June. The best soil for celery is well cultivated and well powdered peat soil. The plants can be planted 6 to 9 inches apart in single rows about 2 feet or more apart, or can be planted in double rows 6 to 9 inches apart and 2-3 feet between each double row. Bleaching should be started at least 2 weeks before harvest, and can be done with a wide board, special paper, or the soil can be hilled up around the plants. An ounce of seed should produce from 5,000 to 10,000 plants.

210	<b>Paris Golden Yellow Self-blanching</b> .....	.25	1.00	3.50	12.00
	Tall, very fast grower, golden yellow heart, stalks thick, broad and crisp, with a fine nut-like flavor. Imported French Seed.				
211	<b>Paris Golden Yellow Self-blanching</b> .....	.10	.50	1.50	5.00
	American grown seed, extra good strain.				
212	<b>Golden Yellow Self-blanching</b> .....	.25	1.00	3.50	11.00
	The old original short variety, less stringy and better for late use, as the heart is more full. Imported French seed.				
213	<b>Golden Self-blanching</b> .....	.10	.50	1.50	5.00
	Extra good strain of American grown seed.				
214	<b>Michigan Golden</b> .....	....	1.50	5.00	.....
	New yellow resistant strain.				
215	<b>Golden Plume</b> .....	.10	.50	1.50	5.00
	Heavy, strong growing American variety. Very good for shipping.				
217	<b>Golden Phenomenal</b> .....	.10	.50	1.50	.....
	An improved Golden Plume. More disease resisting, taller and heavier.				
218	<b>Giant Pascal</b> .....	.05	.30	1.00	.....
	One of the finest flavored variety of Celery. Grows compact but vigorous. When bleached is yellowish white.				

**CELERY—Continued**

		Pkt.	Oz.	¼ Lb.	Lb.
220	<b>Easy Blanching</b> .....	.05	.30	<b>1.00</b>	.....
	Fairly large, late, green, bleaches to clear white. Good quality and good keeper.				
221	<b>White Plume</b> .....	.05	.25	.80	.....
	Early white variety.				

**CELERIAC OR ROOT CELERY**

*Seed should be started under glass in March, and the plants set out in rich, fairly moist ground in late May. Set the plants about 1½ feet apart.*

225	<b>Prague Giant</b> .....	.05	.25	.80	.....
	Large smooth roots with clear white flesh.				

**CUCUMBER**

*Out doors, cucumber can be seeded in rows 3-4 feet or more apart and the seed dropped 3-4 inches apart, an inch below the surface of the ground, or the seed can be planted in hills about 4 feet apart and 8-10 seeds to each hill. A good method where the soil is not very rich, is to dig a trench and fill in some fresh manure and then at least 6 inches of soil between the manure and the seed.*

230	<b>Hunderup Forcing.</b> Extra good Greenhouse variety, English type, grows up to 24 inches long, smooth, slim cucumber. Seedless if insects are kept away. Has a very fine flavor, heavy producer. Not recommended for out-door planting. 10 seeds, 20c—100 seeds \$1.50.				
231	<b>Tottenham.</b> Not quite so prolific, and not as long as the Hunderup, but otherwise the same type. 10 seeds 15c—100 seeds \$1.25.				
235	<b>315</b> —100 seeds <b>\$1.00—\$5.00</b> per ounce.  Smooth, dark green, grows 9-10 inches long, blunt ends. Stays green a long time. Extra good for Greenhouse, but can be used in Frames and outdoors. American greenhouse grown seed.

703	<b>Stowell's Evergreen</b> .....	.15	.40	3.25
	Tall, late, very large white ears.			

**TOMATO**

One method to grow early Tomatoes is to plant strong, healthy plants of a good early variety, about  $1\frac{1}{2}$  feet apart, in rows about 3 feet apart, then, at the same time set along side each plant a fairly heavy stake. A Tonkin cane, 5 ft. long and  $\frac{1}{2}$  to  $\frac{3}{4}$  inch thick is good. As the plant grows, the main or center stem should be tied loosely with Raffia to the stake and all side-shoots or suckers trimmed off. When 5 or 6 flower clusters are set, the top of the plant should also be taken off, but one leaf must be left over the top flower. That way there will not be so many Tomatoes on the plants, as when letting it grow its own way, but the tomatoes will mature much earlier and the fruit will be perfect. If more than 5 or 6 clusters are wanted from a plant, the two bottom side branches can be left growing and tied on the stake, and stopped when 3 clusters are set. Varieties are listed as to their earliness, the earliest first.

## Wilt Resisting Asters

One of the troubles Growers have had in late years with Asters, has been the Fusarium Wilt disease, but there has been developed several strains which are immune to that. This is the cause of the stems rotting and is a disease from the soil. It turns the stems black. Starts at the ground and works up through the plant. This must not be confused with the "yellow," which is said to be transported by an insect, and from which there does not seem, as yet, to be any other prevention than to keep the insects away.

We offer the following varieties which will be resistant to the Fusarium Wilt.

	<b>Early Beauty</b> , 1500 purple, 1501 white, each.....	.25	.60	2.00

The culture of Petunias are very easy for the small-flowered or cheaper varieties, as these can be sown both inside and outside with a fair expectation of good results. For the large-flowered or better varieties it is more difficult to get them started. For May blooming, they should be sown in a fairly warm place in January or February, and the seeds just sprinkled on the surface of very fine sifted soil and kept moist. As soon as large enough to move, they can be transplanted and later put in pots. The seeds that produce the double flowered plants, usually are weaker than the single flowered, and in transplanting the double varieties, care should be taken with the weakest and poorest looking seedlings, as they usually produce the best double flowers.

### SUGGESTIONS FOR MAKING A LAWN

In making a new lawn, the soil should be spaded very thoroughly and if any Quack-grass is present, all the roots should be picked out. The surface must be made level at the same time. After leveling, the soil should be either tramped down or rolled with a heavy roller to get the foundation firm. Seed should be broad-cast very evenly at the rate of 1 lb. of good clean seed to about 200 square feet. The seed should then be either covered with a thin layer of soil or chopped down and the soil rolled again and watered. For repairing an old lawn we recommend to scratch the sod thoroughly and deep with a rake so the dead grass can be cleared off and the surface of the soil rough, then sprinkle the seed. Now go over the lawn again with the back or smooth side of the rake to cover up as much seed as possible. Another method will be to sprinkle seed on the old lawn and then cover with at least  $\frac{1}{2}$ -inch of finely pulverized peat moss. Can offer such Peat Moss in truck loads at a very reasonable price. Once in a while the lawn, especially an old one, should be given an application of some good plant food containing Nitrogen.

Scene from the beautiful Horticultural Gardens at A Century of Progress, Chicago. Vigoro was used to keep the exhibition gardens looking their best throughout the 1933 and 1934 Fair season.

## for lawn and garden beauty Give Your Plants a "SQUARE MEAL"

**T**O GET a full measure of beauty from your lawn and garden you must feed them regularly with a complete, balanced plant food. We recommend that you use Vigoro, the complete plant food made by Swift.

Vigoro was the plant food selected for use on the Horticultural Exhibition Gardens at A Century of Progress in 1933 and 1934. These gardens amazed millions of visitors to the Fair with their beauty, yet conditions under which they were required to grow were extraordinary. It was necessary to make these gardens in washed sand, which had been covered with a thin layer of top soil. Vigoro was selected because only a complete plant food could assure finest growth.

### VIGORO Is Easy to Use!

Anyone can have wonderful success with Vigoro if they will take three simple steps:

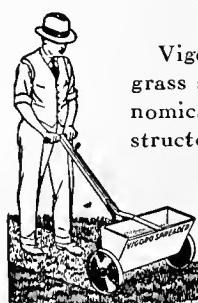

1. Read the directions enclosed in each bag of Vigoro.
2. Apply Vigoro evenly, sowing it by hand like grass seed, or, better, putting it on with an efficient Vigoro Spreader.

3. Immediately after applying to established lawns, soak down thoroughly. Soaking carries the plant food down to the plant roots. When not practical to water, applications to lawns should be followed by a light dragging to shake the plant food off the blades.

### Clean, Odorless, Economical!

Vigoro is sanitary and odorless and does not contain weed seeds or refuse, which is so objectionable to work with. It is most economical to use, for only four pounds are required to feed properly 100 square feet of lawn or garden area. Use our tested seed, and Vigoro, the complete plant food, for the best results in your lawn and garden.

### Vigoro Spreaders

Vigoro Spreaders apply Vigoro and grass seed quickly, evenly, and economically. All models sturdily constructed; will last indefinitely.

## BAVARIAN SEEDERS (Patented)

### *For Greenhouses and Hotbeds*

Small, very handy seeders, practical to use in Greenhouses and in Frames where a large machine cannot be used. Will plant almost any variety of seeds except very large seeds, such as Corn, Beans and large seeded Peas. Can be used for Sweet Peas and Beets if the extra Arbor is used. A small brush regulates the feed.

**No. 1.** One rowed Seeder holds about 4 ounces of Radish Seeds. Handle can be moved in any direction. Price, \$4.00.

**No. 1A.** Extra Arbor for very small and very large seeds. Price, 50c.

**No. 4.** Four rowed machine to plant four rows of seeds  $2\frac{1}{4}$  inches apart. The cylinder is made with three sets of holes. Price \$8.00.

We do not furnish the wooden handles for any of these machines.
